MERCY CLINIC

Non-profit medical and dental clinic in Fort Worth, TX

Offers free care to uninsured adults

Over 150 volunteers each month

Volunteers include
- Doctors/Nurses
- Dentists/Hygienists
- Support (greeters, etc)

All scheduling, check in/out data managed by one full time admin via email and paper

The Problem

- In house Whiteboard schedules
- Mass Email communication
- Paper check-in/out

All organized and digitized by ONE person - the Admin spends hours adding numbers to excel (sporadically).

- Time consuming
- Delays report generation
- Inconvenient for volunteers

Our Solution

- A web-based schedule builder
  - Volunteers can schedule for shifts remotely
  - Administrator can make changes to schedule for her own devices
  - Everything is stored in a database

"So we're putting the whiteboard online... among a few other things."

Position Statement

Why should Mercy use our solution?

Free, tailored software

Low cost maintenance
