An AlphaGo Research and Education Web Application

Meet the Team

Kien Nguyen
Team Lead

Christain Arciniega
Frontend Manager

Derek Isensee
Backend Manager

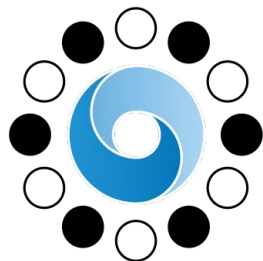

Ryan Moncrief
Personnel/Planning Manager

Ryan Clements
Database Manager

What is AlphaGo?

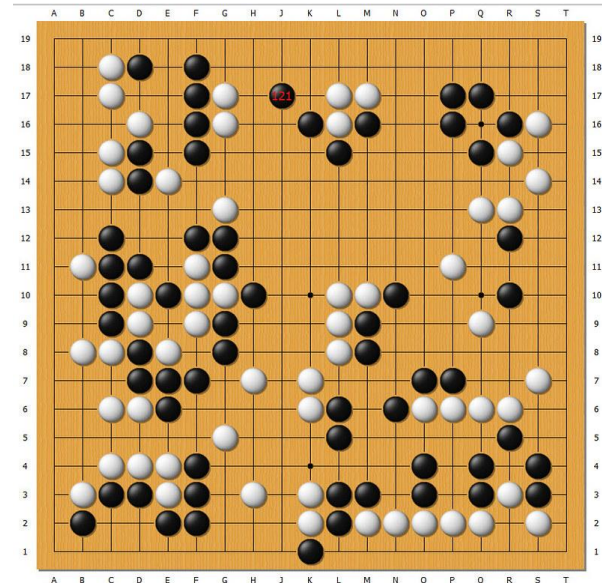

AlphaGo

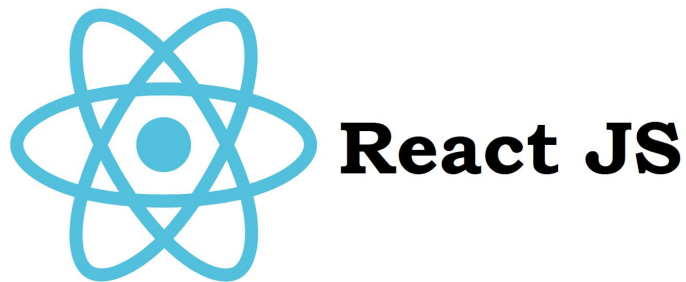

- Deep learning AI project
- It is notoriously hard to teach AI to play the game of Go
 - AlphaGo is the first to beat a professional Go player
- Over time, AlphaGo improved its decision making
 - Now considered one of the best Go “players”

Where Do We Come in?

- AlphaGo has inspired research projects by many...
- Including our clients, Dr. Liran Ma. and Dr. Ze-Li Dou
- We will create a web application for the play and training of different Go AI agents.

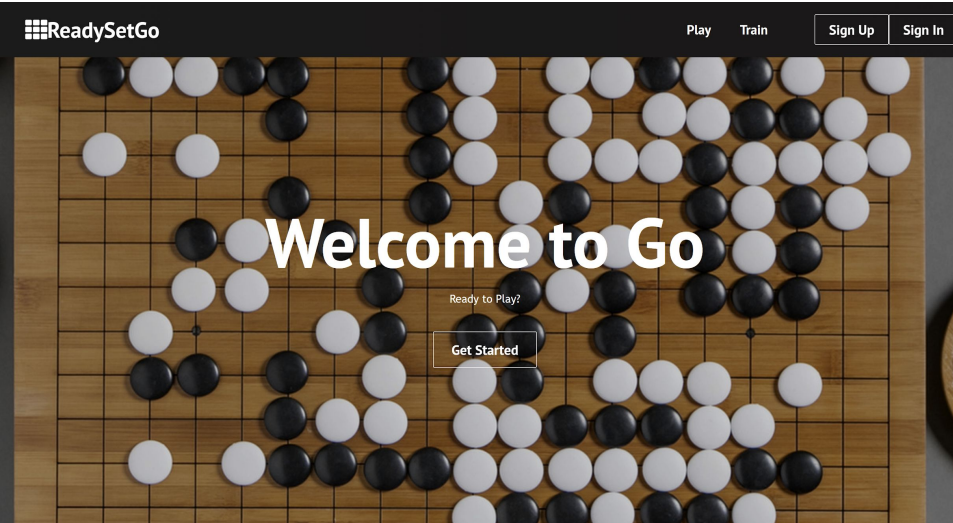

Our Development Stack

Key Site Features

- Users and accounts
- Play Go against uploaded AI agents of your choice
- Researchers can train existing AI agents or create new ones.

Thank you!
