

Chalk Initial Team Meeting					
Date:	Sep 22, 2022				
Time:	5:00pm - 5:10pm				
Attendees:	Zyler Niece	Emma Sanders	Joey Flores	Matthew Bolding	
Absentees:					
Note taker:	Matthew Bolding				
Location:	Zoom				
Agenda:	Expectations				
Agenda item 1:	Expectations				
Discussion:	Discussed the cilents possible expectations. For our own expectations we want to under promise and over deliver Questions for cilents: what do you have in terms of both existing data and environment for our application.				
Conclusions:	Understanding of our expectations and on the same page for our cilent meeting.				
Action items					
Action item 1:	Buisness causal for cilent meeting.				
Action item 2:	Schedule once a week meetings for team.				
Action item 3:	Schedule bi-weekly meetings with cilent.				
Action item 4:	Find out the exact environment we are expected to use.				
Chalk Initial Cilent and Team Meeting					
Date:	Sep 23, 2022				
Time:	2:00pm - 3:00pm				
Attendees:	Zyler Niece	Emma Sanders	Joey Flores	Matthew Bolding	
	Dr. Wei	Cilents			
Absentees:					
Note taker:	Zyler Niece	Emma Sanders			
Location:	Cilent's Office				
Agenda:	Expectations and Questions				
Agenda item 1:	Expectations				
Discussion:	Got an overview of thier company and worked on providing details for this project as well as their expectations and desired outcomes from this work. Set requirements and wants such as the need for asset and account management. Talked specifically about the process a truck/trailer goes through and who should have certain permissions to put the trucks/trailers in/out of service at different points during their process. Talked about the current problems facing the way they currently handle assest management such as there not being a separation of permissions. They emphasized the most important part of the project is making sure different roles have different permissions when it comes to accessing the asset database. Client Wants: 1. In/Out Service for assets. 2. Read only for certain roles. 3. Be able to Filter and Sort by certain criteria. 4. Logging the user who placed truck/trailer in/out of service. 5.Use Microsoft services				
Conclusions:	Got a better understanding on what the client wants for the project.				
Action items					
Action item 1:	Bi-weekly meetings on zoom or in person once development begins.				
Action item 2:	Start properly organizing our vision and scope documents.				
Action item 3:					
Action item 4:					

Chalk Second Team Meeting				
Date:	Sep 29, 2022			
Time:	3:30pm - 4:30pm			
Attendees:	Zyler Niece	Emma Sanders	Joey Flores	Matthew Bolding
Absentees:				
Note taker:	Zyler Niece			
Location:	RJH 201			
Agenda:	Use Cases	Glossary		

Agenda item 1:	Use Cases
Discussion:	Discussed what the various roles are at the company and what kind of privledges/use cases each role needs to be successful. Made sure everyone in our group had a understanding of what permissions each role has in regards to In-Service/Out-Service or Read-Only.
Conclusions:	Figured out a rough draft of use cases for our project
Action items	
Action item 1:	Create Use Case Diagram.
Action item 2:	Work on Use Case Document to accurately describe the various use cases.
Action item 3:	Send email to Client clarifying the roles and permissions of each role.
Action item 4:	

Agenda item 2:	Glossary
Discussion:	Discussed what different terms and roles we need to define inside of our glossary. Creating our glossary with the hopes that someone who knows nothing about project at all could understand the various terms and roles just be reading our glossary.
Conclusions:	Figured out a rough draft
Action items	
Action item 1:	Email Client asking them to define certain roles/terms that are used.
Action item 2:	Work on Glossary document.

In-Class Chalk Team Meeting				
Date:	Sep 30, 2022			
Time:	9:00am - 9:50am			
Attendees:	Zyler Niece	Emma Sanders	Joey Flores	Matthew Bolding
Absentees:				
Note taker:	Zyler Niece			
Location:	TUC 328			
Agenda:	Work on Use Case and Vision Documentation			

Agenda item 1:	Use Cases
Discussion:	Work on finishing the rough draft of our Use Case Document.
Conclusions:	Finished a rough draft of use cases for our project
Action items	
Action item 1:	Continue working on Use Case Document to accurately describe the various use cases.

Client-Team Meeting					
Date:	Oct 5, 2022				
Time:	4:00pp - 4:30pm				
Attendees:	Dorian	Zyler Niece	Emma Sanders	Joey Flores	Matthew Bolding
Absentees:					
Note taker:	Matthew				
Location:	Teams				
Agenda:	Clarifications and Requesting Information				
Agenda item 1:	Business Objectives				
Discussion:	Dorian will get back with us regarding data.				
Conclusions:					
Action items					
Action item 1:	Await Dorian's email.				
Action item 2:					
Action item 3:					
Action item 4:					
Agenda item 2:	Wireframing				
Discussion:	They're mainly looking for functionality and accessibility. The easier it is to use, the better. If it's "pretty" that's okay. Options for back and forth regarding the design part of the website—Dorian will happily give feedback regarding a design we might not like. As of right now, we have the "blank piece of paper."				
Conclusions:	It's up to us to design it, but an "are you sure" button would be very useful.				
Action items					
Action item 1:	Design wireframe to our specification.				
Action item 2:	Ask Dorian any questions if needed.				
Action item 3:					
Action item 4:					
Agenda item 3:	Environment Set Up				
Discussion:	It'll be ready tomorrow morning. We might have to do some configurations on our end so that we can connect. Mentioned Samba.				
Conclusions:					
Action items					
Action item 1:	Communicate with Dorian whether we can enter the first portal as soon as possible.				
Action item 2:					
Action item 3:					
Action item 4:					
Agenda item 4:	Company Position Roles				
Discussion:	Drivers don't do anything on website. The pusher has read only. The email has the rest of the information.				
Conclusions:	Await Dorian's email.				
Action items					
Action item 1:					
Action item 2:					
Action item 3:					
Action item 4:					

Chalk Team Meeting					
Date:	Oct 13, 2022				
Time:	5:00pm - 5:30pm				
Attendees:	Zyler Niece	Emma Sanders	Joey Flores	Matthew Bolding	
Absentees:					
Note taker:	Matthew Bolding				
Location:	Teams				
Agenda:	Wireframe Protot	Business Goals	Release Plan		
Agenda item 1:	Wireframe Prototype				
Discussion:	All group members accepted the initial draft of the wireframe and understand Dorian's suggestions.				
Action items					
Action item 1:	Update wireframe to include Dorian's suggestions.				
Agenda item 2:	Business Goals				
Discussion:	We all noted the business goals Dorian set over, and we can see just how much time this application could save their company.				
Conclusions:	We'll making a difference in their company by reaching our goals.				
Action items					
Action item 1:	Update the Vision Document to include the business goals.				
Action item 2:	Complete the rest of the Vision Document.				
Agenda item 3:	First Iteration's Release Plan				
Discussion:	It might be good to have goals like understanding the database schema, getting us all logged in and used to the development environment, and working out the design of the backend as some of the initial tasks. Since their virtual environment won't be the configuration we expected, it might take some time for us all to get used to it; we'll be				
Conclusions:	Some iteration planning dependent on Dorian's response time.				
Action items					
Action item 1:	Await environment access.				
Action item 2:	Plan development of homepage.				

Dorian-Team Meeting					
Date:	Oct 20, 2022				
Time:	12:00pm - 1:00pm				
Attendees:	Zyler Niece	Joey Flores	Matthew Bolding	Dorian	
Absentees:	Emma Sanders - work				
Note taker:	Matthew Bolding				
Location:	Teams				
Agenda:	Logging into Chalk's On-Premises Servers				
	Wireframe				

Agenda item 1:	Logging into Chalk's On-Premises Servers
-----------------------	--

Discussion:	Dorian walked us through signing into the their website so that we can connect to their virtual machines via Splashtop for RMM. We learned that our account are not quite ready yet for logon, but they should be soon. There are three computers TCU-DC, TCU-DEV, and TCU-SQL01. TCU-DC is the VM we'll deploy the applicaiton on, we'll
--------------------	---

Action Items	
---------------------	--

Action item 1:	Awaiting futher account configuration.
-----------------------	--

Agenda item 2:	Wireframe
-----------------------	-----------

Discussion:	Dorian said that he would deliver our wireframe to higher ups. If we are not given approval, Dorian will make a low-fidelity model for us to work off, otherwise, we will use what we have.
--------------------	---

Action Items	
---------------------	--

Action item 1:	Update the wireframe to Dorian's specifications.
-----------------------	--

Team Meeting					
--------------	--	--	--	--	--

Date:	Oct 21, 2022				
Time:	1:30pm - 2:30pm				
Attendees:	Zyler Niece	Joey Flores	Matthew Bolding	Emma Sanders	
Absentees:					
Note taker:	Matthew Bolding				
Location:	LIB 2123 / Zoom				
Agenda:	Recapping Meeting with Dorian				
	First Iteration Planning				
	Revising Glossary, Vision and Scope Document, and Use Cases, and Wireframe				
	General Infrastructure and C4 Diagram				
	IAB Presentation				

Agenda item 1:	Recapping Meeting with Dorian
-----------------------	-------------------------------

Discussion:	Joey, Zyler, and Matthew brief Dorian on the status of logging into the virtual machines Chalk is configuring for us.
--------------------	---

Agenda item 2:	First Iteration Planning
-----------------------	--------------------------

Discussion:	After brainstorming, we found several tasks that we could complete in a single iteration and have some sort of deliverable at its end. These tasks included installing and configuring the software dependencies, database configuration, as well as front and back end design. Since not all of us might be familiar with Angular and Node.js, we
--------------------	--

Action Items	
---------------------	--

Action item 1:	Begin the first iteration on Oct 24, 2022.
-----------------------	--

Agenda item 3:	Revising Glossary, Vision and Scope Document, and Use Cases, and Wireframe
-----------------------	--

Discussion:	Emma will revise the glossary, Zyler will revise the Use Case document, and Joey and I will tag team the Wireframe and Vision and Scope updates. Of course, we can help others with their documents too.
--------------------	--

Action Items	
---------------------	--

Action item 1:	Revise documents by the start of the first iteration.
-----------------------	---

Agenda item 4:	General Infrastructure and C4 Diagram
-----------------------	---------------------------------------

Discussion:	Emma opted to start the design of the C4 Diagram. Since Dr. Wei wants to see this by Monday, work should begin as soon as possible.
--------------------	---

Action Items	
---------------------	--

Action item 1:	Emma will start the diagram and have a working diagram by Oct 23, 2022.
-----------------------	---

Agenda item 5:	IAB Presentation
-----------------------	------------------

Discussion:	Zyler volunteered to create the presentation for the Industry Advisory Board meeting on Oct 28, 2022. He'll have a draft ready by the Oct 24, 2022, and present it on the day.
--------------------	--

Action Items	
---------------------	--

Action item 1:	Zyler will start making the presentation in time for the draft deadline of Oct 24, 2022.
-----------------------	--

Team Meeting					
--------------	--	--	--	--	--

Date:	Oct 23, 2022				
Time:	4:00pm - 4:30pm				
Attendees:	Zyler Niece	Joey Flores	Matthew Bolding	Emma Sanders	
Absentees:					
Note taker:	Matthew Bolding				
Location:	Zoom				
Agenda:	Delegating Tasks				

Agenda item 1:	Discuss documentation completion
-----------------------	----------------------------------

Discussion:	Each member gave an update on the status of the assigned documents and noted what's left to be completed.
--------------------	---

Action item 1:	Complete documents before class on Monday
-----------------------	---

We did not meet this week.

Team Meeting

Date:	Nov 3, 2022				
Time:	5:30pm - 6:00pm				
Attendees:	Zyler Niece (Zoom)	Emma Sanders (Zoom)			
	Joey Flores (RJH)	Matthew Bolding (RJH)			
Absentees:					
Note taker:	Matthew Bolding				
Location:	RJH 203 / Zoom				
Agenda:	Preparations for Friday's Checkup with Wei				
	SRS Delegation				
Agenda item 1:	Preparations for Friday's Checkup with Wei and Monday's Deadline				
Discussion:	For Friday, we play to show Dr. Wei the installed Database, the CI integration in Github, and that we have the Angular template runnable on TCU-DEV02. Emma self-assigned working on the basic front end so we have something for Monday.				
Action items					
Action item 1:	Attend to our delegated responsibilities.				
Agenda item 2:	SRS Delegation				
Discussion:	We delegated various sections of the SRS as self-assignable for Monday's rough draft deadline. Joey wanted to take the first three sections, and Matthew planned to fill in the technical areas pertaining to the database. All of us plan to fill in where necessary.				
Action items					
Action item 1:	Attend to our delegated responsibilities.				

Dorian-Team Meeting

Date:	Nov 9, 2022				
Time:	2:00pm - 2:30pm				
Attendees:	Matthew Bolding	Dorian Dhamo	Joey Flores	Zyler Niece	Emma Sanders
Absentees:					
Note taker:	Matthew Bolding				
Location:	Teams				
Agenda:	Clarifying Requierments				

Agenda item 1:	Clarifying Requierments
-----------------------	-------------------------

Discussion:	<p>- From the time of submission of a request, the CMSAMS should take very little time to process the request. Dorian did not give an explicit time requirement, but it should be reasonably quick. - There should not be an undo button. - Leadership has not looked over the most recent wireframe yet, but he will provide feedback as soon as possible. Emma showed her initial mockup with fake data, and Dorian really liked, but there's some changes he think we could already make. He said that he'd provide us a photo to explain what he'd like to be changed. - Microsoft SQL Server version 2019 is good. - The logging service of CMSAMS should log as many actions as possible, including but not limited to what a user searched, when they logged in, actions on the assets, etc. - Looking ahead to Phase 2, which is during the spring semester, Dorian expressed that us developing an API endpoint for CMSAMS would be something he'd like to see. - We made Dorian aware of the presentation we're giving during the last week of class.</p>
--------------------	---

Action items

Action item 1:	Update documentation to reflect the gathered information.
Action item 2:	Await feedback: wireframe artifact, approval for wireframe (even though we've started?)

Team Meeting

Date:	Nov 10, 2022				
Time:	5:00pm - 5:30pm				
Attendees:	Matthew Bolding	Joey Flores	Zyler Niece	Emma Sanders	
Absentees:					
Note taker:	Matthew Bolding				
Location:	Zoom				
Agenda:	Update Documentation				
	Front End Update				

Agenda item 1:	Update Documentation
-----------------------	----------------------

Discussion:	Now that we have more information following our meeting with Dorian earlier this week, we need to update the documentation. At the highest priority, we should revise the Iteration Plan and the Use Case document, as it still contains some from the Super Frog Scheduler template.
--------------------	---

Action items

Action item 1:	Continue updating the documentation, especially considering the Iteration Plan.
-----------------------	---

Agenda item 1:	Front End Update
-----------------------	------------------

Discussion:	Emma showed us all the progress she's made which includes a login page, default view all page, and a tractor and trailer only page. She plans to merge it soon, and continue working on it, hopefully so that a good version exists by Wednesday of next week.
--------------------	--

Action items

Action item 1:	Emma will continue to work on the front end on her local branch, and push what she has to the main branch soon.
Action item 2:	We are still awaiting formal approval for the front end, but Dorian is very confident that they'll like it.
Action item 3:	To make testing the front end easier, we should prioritize getting a CI/CD pipeline working in its entirety. Helps CMS exec. review.

Team Meeting					
Date:	Dec 1, 2022				
Time:	4:00pm - 4:30pm				
Attendees:	Matthew Bolding	Joey Flores	Zyler Niece	Emma Sanders	
	Dorian Dhamo				
Absentees:					
Note taker:	Matthew Bolding				
Location:	Teams				
Agenda:	Update progress on the frontend and the backend. Note tasks heading into Thanksgiving break.				
Agenda item 1:	Update progress on the frontend and backend.				
Discussion:	Dorian asked us questions as to our development progress. We informed him that the progression of both the front end and back end is going well, and we are on track for a Wednesday presentation. For the presentation, we aim to have their current solution implemented.				
Action items					
Action item 1:	The second iteration will include role based access and active directory integration.				
Action item 2:	We need to consider refactoring our front end to account for thousands of records being returned.				

Team Meeting					
Date:	Jan 24, 2023				
Time:	12:00pm - 12:30pm				
Attendees:	Matthew Bolding	Joey Flores	Zyler Niece	Emma Sanders	Dorian Dhamo
Absentees:					
Note taker:	Matthew Bolding				
Location:	Teams				
Agenda:	Deployment	Active Directory	Login Page		
Agenda item 1:	Deployment				
Discussion:	Unlike what we previously thought, we will have free reign to deploy the applicaiton where ever we would prefer. Following the handoff, Chalk's IT team will deploy the application to their liking.				
Action items					
Action item 1:	The team will discuss where to deploy the applicaiton in the 1/26/2023 team meeting.				
Agenda item 1:	Active Directory				
Discussion:	We will be creating our own Active Directory account on the MANBEARPIG domain they have set up for us. We will not be connecting to Chalk's production AD servers.				
Action items					
Action item 1:	Add and configure users on our Active Directory.				
Action item 2:	Ask Dorian for example user configurations.				
Agenda item 1:	Login Page				
Discussion:	To login, users will not be redirected to any central login page. Since we are using Active Directory, we can use a simple form to facilitate user logins.				
Team Meeting					
Date:	Jan 26, 2024				
Time:	5:30pm - 6:00pm				
Attendees:	Zyler Niece	Emma Sanders	Matthew Bolding		
Absentees:	Joey Flores				
Note taker:	Matthew Bolding				
Location:	Zoom				
Agenda:	Prepare for Friday Check-In				
Agenda item 1:	Prepare for Friday Check-In				
Discussion:	We discussed the various things we intend to go over with Dr. Kadiyala on Friday. We each gave our own individual update as though we were in the meeting and shared our opinions. To resolve our only roadblock at the moment, we intend to work together to get this issue—the frontend-backend connection—resolved as quickly as possible so development can continue.				
Action items					
Action item 1:	Resolve the roadblock.				

Team Meeting					
Date:	Feb 1, 2023				
Time:	9:00am - 9:30am				
Attendees:	Matthew Bolding	Joey Flores	Dorian Dhamo		
Absentees:	Zyler Niece	Emma Sanders			
Note taker:	Matthew Bolding				
Location:	Teams				
Agenda:	Deployment	Active Directory			
Agenda item 1:	Deployment				
Discussion:	Dorian informed us that, as we believed, the virtual machines they've created for us cannot be accessed from outside their network. So, AD and the SQL server will need to be copied or mocked in such a way so that when we deploy the website, we will have functioning security roles and "live" data.				
Agenda item 1:	Active Directory				
Discussion:	AD security groups is the way in which we can enforce role-based privileges. We also need to consider the extensibility of our implementation. The roles won't be based on job title, but rather the security group(s) in which the employee falls.				
Team Meeting					
Date:	Feb 3, 2023				
Time:	10:45am - 11:00am				
Attendees:	Matthew Bolding	Joey Flores	Zyler Niece	Emma Sanders	
Absentees:					
Note taker:	Matthew Bolding				
Location:	Zoom				
Agenda:	Sync				
Agenda item 1:	Sync				
Discussion:	We synced to get on the same page just before the Friday meeting with Dr. Kadiyala. Zyler's laptop got water damaged over the week, so his work on the login page was lost, unless Best Buy can recover the data. Emma had no power for two days of the week, so she was unable to work towards goals. Joey started configuring more active directory setting on the domain controller VM. Matthew completed the REST API and looked into using Azure for hosting our deployment.				

Team Meeting

Date:	Feb 12, 2023				
Time:	3:00pm - 3:30pm				
Attendees:	Matthew Bolding	Joey Flores	Zyler Niece		
Absentees:	Emma Sanders				
Note taker:	Matthew Bolding				
Location:	Zoom				
Agenda:	Progress	What's Next			
Agenda item 1:	Progress				
Discussion:	Although Emma was unable to attend, she made many upgrade to the MUI table and sorting buttons. Matthew fixed some errors in various backend procedures and made it so that the type of asset is returned. He also helped Emma some on getting the data to flow into the table. Zyler has the login page appearing functional and plans to push it soon. Joey has yet to hear back from Dorian regarding the numerous difficulties getting				
Agenda item 1:	What's Next				
Discussion:	Joey plans to speak with Dr. Ma to get the LDAP AD problem resolved as quickly as possible. We need to merge Emma's and Zyler's branch to the main one so that we can work with all the pages as intended. Then, we can start to work on integrating the login.				

Team Meeting					
Date:	Feb 16, 2023				
Time:	3:00pm - 3:30pm				
Attendees:	Matthew Bolding	Joey Flores	Zyler Niece	Emma Sanders	
Absentees:					
Note taker:	Matthew Bolding				
Location:	Zoom				
Agenda:	Progress	What's Next			

Agenda item 1:	Progress
Discussion:	After merging all the changes from the recent branches, we can now access the login page and see the new table. Joey has been continuing to work on the LDAP configuration file with help from Dorian and Dr. Ma.

Agenda item 1:	What's Next
Discussion:	We need to implement the modify button and incorporate the role-based access with AD. We also need to consider the responsiveness of the entire website since many users will be on mobile devices. We also want to ensure that those off-site users can still access the website. We need to ask Dorian for feedback as well. We need to consider how to test the application too.

Team Meeting					
Date:	Feb 17, 2023				
Time:	9:00am - 9:30am				
Attendees:	Matthew Bolding	Joey Flores	Zyler Niece	Emma Sanders	Dorian Dharmo
Absentees:					
Note taker:	Matthew Bolding				
Location:	Teams				
Agenda:	Feedback	Acceptance Testing			

Agenda item 1:	Feedback
Discussion:	Dorian really liked what we had to show him in terms of the login page, the new table, and the potential pagination tools. Him and the rest of the team are especially interested in the mobile-friendly aspect of our application; their current solution is not mobile friendly at all.

Agenda item 1:	Acceptance Testing
Discussion:	Following the completion of development on March 10th, Dorian said that him and a small team would test the application. We don't need to worry about making the application available to them; they can work inside the VMs.

Team Meeting					
Date:	Feb 22, 2023				
Time:	9:00am - 9:30pm				
Attendees:	Matthew Bolding	Joey Flores	Zyler Niece	Emma Sanders	Dorian Dhamo
Absentees:					
Note taker:	Matthew Bolding				
Location:	Teams				
Agenda:	Progress	VM Issue			
Agenda item 1:	Progress				
Discussion:	Emma explained how she was having some problems with the MUI table especially since there's so much data. Joey has almost worked out all of the LDAP configuration problems—he has much more progress than last week. Matthew has backend pagination fully functional through the REST API calls.				
Agenda item 1:	VM Issue				
Discussion:	All of the virtual machines went down the night before our meeting due to an unscheduled Windows patch. The issue has since been resolved, but it's possible that TCU-SQL01 might go down sometime soon for its update which has been failing.				
Team Meeting					
Date:	Feb 24, 2023				
Time:	9:30am - 10:00am				
Attendees:	Matthew Bolding	Emma Sanders	Zyler Niece		
Absentees:	Joey Flores				
Note taker:	Matthew Bolding				
Location:	Zoom				
Agenda:	REST API				
Agenda item 1:	REST API				
Discussion:	We discussed how we can implement the REST API endpoints. There are five: one for all assets, another for tractors, trailers, and two to send assets in or out of service. The latter two will work with the modify button and the others will work in conjunction with routing and site filtering. We still have yet to implement searching, however.				
Agenda item 1:	Prioritization of Goals				
Discussion:	On our Friday agenda, we have three things left to do: implement the modify button, make the webpage more responsive, and implement AD within the application. These are the only primary features left to implement. We plan to attend to these equally and concurrently so that we can complete development by the set date of March 10th.				

Chalk Team Meeting					
Date:	Mar 1, 2023				
Time:	9:00am - 9:30pm				
Attendees:	Matthew Bolding	Joey Flores	Zyler Niece	Emma Sanders	Dorian Dhamo
Absentees:					
Note taker:	Matthew Bolding				
Location:	Teams				
Agenda:	Feedback	Table Sorting	Check-In?	Downtime	
Agenda item 1:	Feedback				
Discussion:	Dorian really like what we had to show in our brief demo, and he expressed extreme satisfaction for our week-to-week. He liked how fast and snappy our pagination was, and again said just how much he wants to see it function on a mobile device. We're likely doing this via device emulation on Chrome or Firefox. LDAP is coming along very well too.				
Agenda item 2:	Table Sorting				
Discussion:	We confirmed with Dorian that when a user wants to sort one of the columns of data, they mean to sort the entire list of assets and from there do pagination.				
Agenda item 3:	Check-In?				
Discussion:	Dorian let us know that he hasn't heard from either Dr. Wei nor Dr. Dr. Kadiyala to ask about client feedback. During our next meeting with Dr. Kadiyala, we're going to ask her when Dorian might be expecting that.				
Agenda item 4:	Downtime				
Discussion:	Dorian let us know that within the next few weeks, he'll be unavailable during our normal scheduled time due to a business trip that will happen for which he'll have very little head notice. We also discussed the connection issues we had with the SQL server earlier this week; the connection was refusing, and restarting the SQL service resolved the issue. Alternatively, we could restart the VM.				
Team Meeting					
Date:	Mar 3, 2023				
Time:	9:30am - 10:00am				
Attendees:	Matthew Bolding	Emma Sanders	Zyler Niece	Joey Flores	
Absentees:					
Note taker:	Matthew Bolding				
Location:	Zoom				
Agenda:	Documentation	Modify Button	Search Bar		
Agenda item 1:	Documentation				
Discussion:	We discussed how the SRS Abstract draft needs to be looked over. The submission deadline for the abstract and registration is 5:00pm this coming Monday evening. We also need to continue updating all other documentation for the project. For instance, some of the use cases have drifted away from their naming and should be corrected.				
Agenda item 2:	Modify Button				
Discussion:	This weekend, and working into next week as necessary, we're all going to be devoting effort to the modify button. This feature spans all our knowledge. Joey is our SME for LDAP and authentication, Emma is for the front end, Zyler's been spearheading the front end design for the modify button, and Matthew can make sure the backend receives the correct data and is logged as prescribed. We also think that once an asset is modified, the table should be reloaded.				
Agenda item 3:	Search Bar				
Discussion:	The ability to search for an asset is a use case, and Matthew will have the backend procedure updated and API modified so Emma can work the new query parameter into the fetch function.				

Chalk Meeting					
Date:	Mar 8, 2023				
Time:	9:00am - 9:30pm				
Attendees:	Matthew Bolding	Joey Flores	Zyler Niece	Emma Sanders	Dorian Dharmo
Absentees:					
Note taker:	Matthew Bolding				
Location:	Teams				
Agenda:	Search Bar	Acceptance Test	Active Directory		
Agenda item 1:	Search Bar				
Discussion:	The routes and filtering are working just fine, but the search bar is having some problems, bugs, and, what you could call, unexpected features. The bar itself is connected, but it searches by character.				
Agenda item 2:	Acceptance Test				
Discussion:	Since we are approaching the end of development, Dorian wants to know how he can run our applicaiton for testing on his end. A few people around the office have asked how the project's going. To allow for any user to run the application, we are going to move the repository folder to the root of the C drive and provide instructions in the coming days.				
Agenda item 3:	Active Directory				
Discussion:	The efforts on the active directory side of things has made the best progress yet. It can authenticate users and bind clients using the established API. There's an error, however, which causes the connection to terminate.				
Team Meeting					
Date:	Mar 10, 2023				
Time:	9:00am - 10:50am				
Attendees:	Matthew Bolding	Zyler Niece	Joey Flores		
Absentees:	Emma Sanders (Flight)				
Note taker:	Matthew Bolding				
Location:	In Person				
Agenda:	Pair Programming				
Agenda item 1:	Pair Programming				
Discussion:	Since the modify button requires the collective knowledge of many people on the team, we pair programming the modify button.				

Chalk Meeting

Date:	Mar 22, 2023				
Time:	9:00am - 9:30pm				
Attendees:	Matthew Bolding	Joey Flores	Zyler Niece	Emma Sanders	Dorian Dhamo
Absentees:					
Note taker:	Matthew Bolding				
Location:	Teams				
Agenda:	Feedback	Requirement Clarification			

Agenda item 1:	Feedback
-----------------------	----------

Discussion:	Dorian provided feedback. He pointed out that something's wrong with the search bar—it searches the term and deletes what's in the search bar. The modify button pop up should only have one option to which to change the asset's status; why even give the user the option to send a request not changing the asset's status; the opposite of its current state should be pre-selected. Login is glitchy. The login button says submit, not login. The in-service, out-of-service, tractor, and trailer buttons all work great.
--------------------	---

Agenda item 2:	Requirement Clarification
-----------------------	---------------------------

Discussion:	In reference to the original requirements given in the fall presentation, it showed functionality to provide updates to an asset once it's moved back into service. Dorian confirmed that we need only provide this functionality for moving assets out of service.
--------------------	---

Chalk Meeting

Date:	Mar 31, 2023				
Time:	9:00am - 9:30pm				
Attendees:	Matthew Bolding	Joey Flores	Zyler Niece	Emma Sanders	Dorian Dhamo
	Luke Anderson				
Absentees:					
Note taker:	Matthew Bolding				
Location:	Teams				
Agenda:	Demo				

Agenda item 1:	Demo
Discussion:	Luke and Dorian gave great feedback. They were very happy with all the features we demonstrated that the applicaiton has. Although at the time we did not have the mobile-friendly design at the time, they were still very happy with all the features we presented.
