Oct 10 - Oct 17, 2022

Description

We met at a team to discuss our Project Plan and web scraping

We met as a team to finish our Project Plan

Discussed the project plan with team, and filled out the template given out by Dr. Wei

Spent time with websites provided by Brooke to see which ones can allow us to scrape and for the others what are th

Finalised internal project traking sheet for the team, and from now on will maintain it to have assigned roles and delive

Show rest of team the process of web scraping and how it applys to the project

Clean up template code and post as example for team

Fill out schedule and milestones according to template through next Spring

I took notes during our meetings and kept track of them all in the meeting minutes documents

Worked as a team to discuess our overall project plan and how we plan to break it up

Research and listen to David's intro to web scraping so we can use it on the websites that Brooke provided our team

Attented to the meeting to help the team figure out what our iteration plan will look like.

In the learning process of the web scraping and prepare for launch web scraping for next week's task so we can gath

Description

We met at a team to work on web scraping and complete iteration plan

Scraped allbreed.com further in depth to extract more useful information and kept notes of different patterns that can

Arranged meeting with Brooke and developed an agenda to meet on coming Tuesday to discuss those points. Went

Researched into setting up CI/CD with Github and working on practices to achieve good version control to discuss with

Reviewed the slide deck made by Madison and shared comments. Went over all the documents Dr. Wei reviewed and

Show examples, teach team how the process of webscraping works, demonstrate on allbreed.com

Show group how to select certain HTML elements on the page in various ways

Github was committed to before we had talked about formatting and standards, had to recreate repo

I took notes during our meetings and kept track of them all in the meeting minutes documents

I made a short PowerPoint presentation for the IAB meeting this coming Friday

Worked to use Beautiful Soup to help make my result of web scraping more readable and the information that I wanted

Read documentation for element plus and how to use it and reviewed over my SuperFrog project from WebTech when

Started the set up of the views and router for our project and created other files that we will be using for the FE

Refresh the knowledges from preivous courses about the techniques we will use for the Front End.

Fix some issues on our documentation drafts.

Trying to get the home page done before our next client meeting.

Created a C4 context diagram for the vision document.

Comments

Draft has been uploaded into the GoogleDrive under Presentations and I know Chirayu and Dr. Wei are going to revie

Started our team discussion about how we will control our GitHub

Finished the Use Case document, and working on Vision document fix.
Started on Front End and try to get few componenets donw, especially home page before our next client meeting so v
Under review

ook how it might look, yet I ran into some stuff, so I only have the basic frame. There is still a small v

window of time to get it done before meeting with Brook.
